

Name/Surname: Yahya Efe KURUAY Student Number: 20220808005 ³⁸/50

BUILDING QUERIES - 5 points each block

Using the tables defined on the screen, build three (3) queries from the text selections below. Each piece of text must be used exactly once. For each of your three queries, explain what your query does.

SELECT *	WHERE studentID = 1234	WHERE Department LIKE "%E"
FROM CourseRegistration	DELETE	SET score = 100
FROM Student	UPDATE CourseRegistration	AND year = 2025

	Your Query	Explain Your Query
1.	SELECT * FROM CourseRegistration WHERE studentID = 1234	Selecting all student with '1234' student ID on the Course Registration table.
2.	UPDATE CourseRegistration WHERE Department LIKE "%E" AND Year = 2025 SET score = 100	setting all the 2025 and beginning with E department scores to 100. ex. E101
3.	DELETE FROM Student	deleting all the values on Student Table.

Using an SQL statement, add your information to the Student table - 5 points

MATCHING - 1 point each

Match the SQL keyword(s) on the right with its typical use on the left. Use the letter of the correct answer. Use the last five blanks to explain the five (5) keywords not used in the given 10 answers (i.e. it is not an SQL keyword or it is an SQL keyword but was not used). **NOTE: Each letter (answer) will only be used once.**
